

Learning is easier with a little help

Help Enrich A Child's Summer – Become A Meemli Mentor!

Join us in bringing summer fun and learning to young students from underserved communities.

You can guide a young student remotely, no special expertise needed, in any or all of these summer programs:

- Science with hands-on experiential learning
- Reading a novel with purpose and understanding
- Writing to build interest and engagement

"I loved it! I had a great experience and despite being the mentor, I learned a lot! I liked the layout of the activities and it was pretty simple to use Meemli and find the lessons."

—Meemli Mentor

What does Meemli mentoring look like?

You will guide the student through fun and easy prepared programs (science includes hands-on experiments).

The programs will run for 6 sessions from early July to late August and you will connect 1-on-1 with the same student on Meemli weekly for about 30 – 45 minutes.

You will be guided on how to mentor on Meemli, including working with students from diverse backgrounds with varying capabilities/needs.

Remote, flexible mentoring allows for convenient scheduling and access.

BENEFITS

Achieve personal growth by adding mentoring/teaching to your experiences

Become a role model, activate listening skills and develop empathy

Enrich your own life by building meaningful relationships

Find fulfillment by having a real impact in a student's learning

Broaden the student's knowledge of careers/work and foster aspirations

"I thought it was great! I liked it because I learned about things I never learned about or knew about. I got to enjoy time with my mentor and we had fun and that is what I loved."

—Meemli Student
